PASSED AUDITS (8)

Show

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

BEST PRACTICES

- ▲ `[user-scalable="no"]` is used in the `<meta name="viewport">` element or the `[maximum-scale]` attribute is less than 5. ✓

These items highlight common accessibility best practices.

CONTRAST

- ▲ Background and foreground colors do not have a sufficient contrast ratio. ✓

These are opportunities to improve the legibility of your content.

NAMES AND LABELS

- ▲ `<frame>` or `<iframe>` elements do not have a title
- ▲ Links do not have a discernible name

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

ADDITIONAL ITEMS TO MANUALLY CHECK (10) Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).
